

This segment of EASIER Spring 2010 training will cover the Gun Free Schools Report and the Behavior Incident Number.

### **General Information -**

Remember that:

- •The EASIER testing window is available from April 19 May 12. All districts are strongly encouraged to use the testing period to submit files and identify errors and omissions in data. Doing so will allow you to submit your final Spring files easily and with no surprises.
- •Final submissions may be made beginning May 17. Remember that all instructional days must be completed before you can create and submit your final files.
- •June 21 is the deadline for certifying Spring EASIER.

# Gun Free Schools Report Report previously done in Spring BEDS Spring EASIER data will now be used to complete the report for you

The Gun Free Schools Report was formerly a separate report for you to complete on Spring BEDS. However, your Spring EASIER data will now be used to complete the report for you.

## **EASIER** Data for Report

- Reason for Removal = 'W' Weapons Related
- Weapon Type = 'H' Handgun, 'R' Rifle or Shotgun, 'F' Other firearm, or 'B' Bomb
- Removal Type Expulsion or Suspension
- Length of Removal
- Student's IEP status

The EASIER data used in completing the report include:

The Reason for the Removal must be 'W' Weapons Related.

The Weapon Type must be 'H' Handgun, 'R' Rifle or Shotgun, 'F' Other firearm, or 'B' Bomb. Removal type will be either an Expulsion or Suspension.

The length of the removal.

The student's IEP status.

These elements, which you formerly entered manually, will be used to complete the federally required Gun Free Schools Report.

Some Student Information Systems have you create the number; others create the number for you automatically. Know how your Student Information System handles this data element.

# Behavior Incident Number

- A number that uniquely identifies the behavior incident that resulted in the removal(s) of one or more students.
- Some Student Information Systems have you create the number and others create the number for you.

The Behavior Incident Number is a new data element this year. It is a number that uniquely identifies the behavior incident that resulted in the removal or removals of one or more students.

This element allows reporting to focus on the incident and not simply the student or the removal.

### Behavior Incident Number

- Multiple students involved in the same incident and removed from classes must have the same Behavior Incident Number.
  - Example: 2 students involved in the same fight must have the same incident number but may have different types or lengths of removals.

Multiple students involved in the same incident and removed from classes must have the same Behavior Incident Number.

Example: 2 students involved in the same fight must have the same incident number but may have different types or lengths of removals.

### Behavior Incident Number

- One student receiving more than one type of removal for the same incident must have the same behavior incident number for each related removal.
  - Example 1: student is assigned 1 day of in-school suspension and 1 day of out-of-school suspension for the same incident
  - Example 2: student is assigned an out-of-school suspension for 8 days prior to receiving a 180 day expulsion from the school board for the same incident

One student receiving more than one type of removal for the same incident must have the same behavior incident number for each related removal.

Example 1: student is assigned 1 day of in-school suspension and 1 day of out-of-school suspension for the same incident

Example 2: student is assigned an out-of-school suspension for 8 days prior to receiving a 180 day expulsion from the school board for the same incident

The Behavior Incident number will also group multiple students with multiple removals for the same incident.
